WHO WE ARE

The story of Havin Trust Mining started at the end of 2013. Our founders got to know each other by using the same platform for buying and selling Bitcoins. They were fascinated by the technology and wanted to build their own farm, only to realize all their friends wanted to participate as well.

They came up with the idea of mining as a service and built the first mining farm in Eastern Europe. Since our founding, we have grown tremendously and a lot has happened, but one thing remains constant: We are all strong believers in the future of digital currencies and we love being part of this growing community.

Havin Trust Mining is one of the leading hashpower providers in the world, offering cryptocurrency mining capacities in every range - for newcomers, interested home miners, as well as large scale investors. Our mission is to make acquiring cryptocurrencies easy and fast for everyone. We provide a multi-algorithm, multi-coin cloud mining service using the latest technology - without any pool fees. The ultimate goal of our existence is to make cryptocurrency mining an easy, smart and rewarding experience for all. Our services already attracted more than 2.000.000 people - We'd be happy to serve you as well!

A close-up photograph of two large, gold-colored Bitcoin coins resting on a green printed circuit board (PCB). The coins feature the Bitcoin logo and the words 'BITCOIN' and 'FINE COPPER'. The PCB is densely packed with various electronic components, including resistors, capacitors, and integrated circuits. A blue wire is visible in the background, and a small blue component is on the PCB near the coins.

Your hardware is already running

Don't wrestle with rig assembly and hot, noisy miners at home. We have the fastest bitcoin mining hardware running for you already!

Mine alternative cryptocurrencies

You can mine any cryptocurrency available in our catalogue! Switch your mining power on the fly for all the coins using our bitcoin mining website.

Get your first mining output today

You will get periodic mining outputs to your designated wallet. Try our Bitcoin mining platform now!

SERVICES

DELIVERING STEADY RETURNS THROUGH VARIETY OF FOCUSED FUNDS WITH DIFFERENTIATED STRATEGIES

BLOCKCHAIN MANAGEMENT

Millions of transactions are made each day using blockchain technology and this number is growing fast. The increasing popularity of crypto technology has caused a surge in blockchains, each with their unique approach towards transactions and privacy. Transactions are made directly between sender and receiver, at very low cost, anonymous and without oversight. At Whale Alert we track these transactions made on various blockchains, convert them into a single standard format and store them in our databases.

Our databases contain thousands of known addresses of individuals, exchanges and companies and we are constantly adding and updating both manually and with the help of AI. Our tracking software is able to instantly identify transactions made to and from known and associated addresses and by doing such, removes anonymity and adds intention for a significant part of the crypto world, especially exchanges.

The team has many years of software development experience in both business and finance. Our team is constantly working on adding more blockchains and improving attribution, data storage and reliability and through our experience and expertise we have been able to create one of the largest and most reliable crypto data collection systems in the world.
